

SHELTER-RITE® BY SEAMAN CORPORATION

The performance standard in architectural fabrics

**FABRIC FOR AIR SUPPORTED STRUCTURES, TENSILE STRUCTURES,
PRE-ENGINEERED FRAME STRUCTURES AND RENTAL TENTS**
Made in the USA, Shelter-Rite leads the industry in modern materials and
methods, producing high performance architectural fabrics for more than 40 years.

FEATURES/ADVANTAGES

- » Unique weft inserted knit polyester design provides excellent tensile, tear and seam strength.
- » Proprietary coating formula provides superior UV and mildew resistance.
- » Time-tested technology results in architectural structures that withstand years of exposure to harsh environments.

TECHNICAL INFORMATION

Architectural Fabrics are made up of four components:

- » Base cloth
- » Adhesive or primer coat
- » Exterior coatings
- » Top coatings systems

Each of these components contributes to different performance properties.

COMPANY PROFILE

Since 1949, Seaman Corporation has been a world leader of innovative, high performance coated fabrics. Combining a unique, puncture-resistant fabric construction with a commitment to superior customer service and satisfaction, Seaman Corporation fabrics exhibit incomparable product performance. Headquartered in Wooster, Ohio, with additional manufacturing in Bristol, Tenn., Seaman Corporation is known worldwide for the production of high value, high-performance fabrics including FiberTite Roofing Systems, Shelter-Rite Architectural Fabrics, XR®-Geomembranes, Shelter-Lite® Truck Tarps, XR-Mariner® Inflatable Boat Fabrics as well as collapsible fuel tanks and tent materials for military and government applications.
